- ruler/straight-edge
- graphing calculator (see calculator guide)

Pre-Calculus

- graphing calculator (see calculator guide)
- ruler
- graph paper

Calculus

- ruler
- graphing calculator (see calculator guide)

CALCULATOR GUIDE: We are now introducing the graphing calculator in the second semester of Algebra 1. Early introduction of this tool has several advantages including the opportunity to explore graphical concepts, learning to solve complex algebraic equations through several methods and increasing problem solving fluency and speed for the ACT and SAT tests. Please be sure your student has a TI 83 or TI 84 calculator by January (the plus edition or CE editions are fine but not necessary).

These calculators are available through amazon both new and used with a price range of \$50 - about \$110. There are also many available on the used market for \$20 - 50. I recommend that you exercise some caution in buying used calculators and be certain they are listed in good or excellent condition. A broken display can be very frustrating! Be sure to contact the vendor about the condition before buying if you can.
